*As discussed with ISOO staff, the NRC has modified our self-imposed FY 97 milestone, which was to review and release 25% of eligible documents in accordance with Section 3.4(a) of the Executive Order 12958, by October 14, 1997. Due to the numerous priorities of NRC's senior declassification authorities, our projected release date will be December 1, 1997. This date change will not affect NRC's ability to meet its deadline to accomplish the total declassification review of the agency's documents within the five year window mandated by the Order.

Question # 37: This number represents those pages that were reviewed by the NRC for declassification, as the Original Classifying Authority, as well as those that were reviewed for declassification and subsequently forwarded to the applicable Federal Agency that served as the document's Original Classification Authority.

Question # 39: During FY 06, our Information Security Branch conducted an agency-wide classification management review for the NRC trained 58 derivative classifiers housed in 13 different NRC offices. That agency-wide program review was counted as one (1) over arching inspection and included with the other three (3) inspections that were conducted in support of the NRC Information Security Program.

Due to a much fewer number of classified documents in FY 1984, the number of pages NRC determined to be eligible for automatic declassification in FY 2009 is substantially less than the number of pages (22,000) reported in FY 2008.</p> <p>Items 19 - 22. WASHINGTON, D.C. 20555-0001

November 4, 2010

Mr. William J. Bosanko, Director
Information Security Oversight Office
National Archives and Records Administration
700 Pennsylvania Avenue, N.W.
Washington, DC 20408

Dear Mr. Bosanko:

In response to your letter of August 3, 2010, enclosed is the U.S. Nuclear Regulatory Commission's (NRC's) fiscal year 2010 submission of Standard Form 311, Agency Security Classification Management Program Data.

The report serves as a compilation of actions taken in support of the NRC classified information security program. Please note that an actual count of hard copy classification decisions was used to calculate the data for this report, while an estimate of electronic classification decisions was used, as requested in Information Security Oversight Office guidance. The NRC has annotated in Part I the number of classification guides created by the NRC and currently in use. All guides have been reviewed and/or updated during the last five years. Additionally, in the comments section, Part J, we have noted that the NRC has created six joint classification guides with the Department of Energy.

Should you have any questions regarding this report, please contact Bernard W. Stapleton, Chief, Information Security Branch, Office of Nuclear Security and Incident Response at 301-415-2214.

Sincerely,

A handwritten signature in black ink, appearing to read "M. Virgilio".

Dear Mr. Fitzpatrick:

In response to your memorandum of August 23, 2011, enclosed is the U.S. Nuclear Regulatory Commission's (NRC's) fiscal year 2011 submission of Standard Form 311, Agency Security Classification Management Program Data.

The report serves as a compilation of actions taken in support of the NRC classified information security program. Please note that an actual count of hard copy classification decisions was used to calculate the data for this report, while an estimate of electronic classification decisions was used, as requested in Information Security Oversight Office guidance. The NRC has annotated in Part I the number of classification guides created by the NRC and currently in use. All guides have been reviewed and/or updated during the last 5 years. Additionally, in the Comments section, Part J, we have noted that the NRC has created eight joint classification guides with the Department of Energy, two of which were also created with the Department of Homeland Security.

PART I: Explanatory Comments

Use this space to elaborate on any section of this form. If more space is needed, provide as an attachment to this form. Provide explanations for any significant changes in trends numbers from the previous year's report.

Part D: Reduction in derivative Secret and Confidential classification decisions from FY2012 to FY2013 is attributed to the U.S. Nuclear Regulatory Commission (NRC) granting USEC Inc.'s American Centrifuge Lead Cascade Facility, the American Centrifuge Plant, and its NRC regulated suppliers conducting classified work in support of the American Centrifuge program an exemption from documenting all classification actions by completing and submitting NRC Form 790, "Classification Record" to the NRC as required by Title 10 of the Code of Federal Regulations (10 CFR) 95.57(c). Since the aforementioned entities were reporting derivative classification decisions to both the NRC and the U.S. Department of Energy (DOE), an exemption from the requirements of 10 CFR 95.57(c) was granted on July 29, 2013 so long as these entities continued to report to the DOE a summary of its classification decisions. This exemption prevents the NRC and the DOE from double counting these derivative classification decisions and reduces the burden on the reporting entities.

Part G: Declassification review will be conducted in FY2014 due to resource constraints.

Part H, Question 51: Increased number of security classification guides from FY2012 to FY2013 as a result of the following additions:

CG-MOX-1, "(U) Joint DOE/NRC Classification and Unclassified Controlled Nuclear Information Guide for the Mixed Oxide Fuel Fabrication Facility" issued September 27, 2013.

CG-TNF-1, "(U) Joint National Technical Nuclear Forensics Guide" issued July 11, 2013.

PART I: Explanatory Comments

Use this space to elaborate on any section of this form. If more space is needed, provide as an attachment to this form. Provide explanations for any significant changes in trends/numbers from the previous year's report.

Part B: Two of the four positions delegated Secret original classification authority are occupied by individuals on a temporary basis. Individuals temporarily acting in a position are not delegated original classification authority. At which time individuals are selected to permanently occupy these positions, then these individuals will be delegated Secret original classification authority from Chairman Macfarlane.

Part D: The increase in derivative classification decisions from FY2013 to FY2014 can be attributed to more accurate estimates of derivative classification decisions made on classified e-mail content. In prior years, the U.S. NRC did not account for an accurate estimate of derivative classification decisions associated with e-mail.

Part G: Declassification reviews were not conducted in FY2014 due to resource constraints. Declassification reviews will be conducted in FY2015, pending the availability of resources.

Part H, Question 51: Increased number of security classification guides from FY2013 to FY2014 as a result of the following addition:

CB-NRC-1, "(U) Classification Guidance for Nuclear Regulatory Commission-Licensed Facility," issued September 18, 2014. CB-NRC-1, Change 1 was subsequently issued on October 2, 2014.

- CG-NRC-CI-1, "Classification Guide for the United States Nuclear Regulatory Commission Counterintelligence Program"
- CG-NRC-ITP-1, "Classification and Designation Guide for the United States Nuclear Regulatory Commission Insider Threat Program"
- CG-NRC-TSCM-3, "Classification Guide for the United States Nuclear Regulatory Commission Technical Surveillance Countermeasures [TSCM] Program"
- CG-RDD-2, "Joint DOE/DHS/NRC Classification Guide for Radiological Dispersal Devices and Radiation Exposure Devices," which supersedes CG-RDD-1, "Joint DOE/DHS/NRC Classification Guide for Radiological Dispersal Devices and Radiation Exposure Devices"
- CG-UUSA-1, "NRC Classification Guide for Louisiana Energy Services doing business as URENCO USA Gas Centrifuge Safeguards & Security"
- CG-UUSA-1, Change 1 "NRC Classification Guide for Louisiana Energy Services doing business as URENCO USA Gas Centrifuge Safeguards & Security"
- CG-UUSA-1, Change 2 "NRC Classification Guide for Louisiana Energy Services doing business as URENCO USA Gas Centrifuge Safeguards & Security"
- CB-DBT-1, "Classification Guidance for the U.S. Nuclear Regulatory Commission Theft or Diversion Design Basis Threat for Category I Fuel Cycle Facilities"

Part D: The changes in derivative classification decisions from FY 2015 to FY 2016 can be attributed to more accurate estimates of derivative classification decisions made on classified e-mail content.

PART J: Explanatory Comments

Use this space to elaborate on any section of this form. If more space is needed, provide as an attachment to this form. Provide explanations for any significant changes in trends/numbers from the previous year's report.

Part B: All four NRC Commissioners are delegated Top Secret original classification authority from the Chairman. Currently, two of the Commissioner positions are vacant. At which time individuals are appointed to occupy this position, then those individuals will be delegated Top Secret original classification authority from the Chairman.

Part D: The changes in derivative classification decisions from FY 2016 to FY 2017 can be attributed to more accurate estimates of derivative classification decisions made on classified e-mail content. Unlike prior years, the NRC initiated a data call to all users of classified information technology systems requesting an accurate estimate of classified e-mails generated that meet the guidance provided by the Information Security Oversight Office.

Part G: Comprehensive automatic and systematic declassification reviews were not conducted in FY2017 due to resource constraints. Increased automatic and systematic declassification reviews will be conducted in FY2018, pending the availability of resources.

Part H: While no formal classification challenges were received in FY2017, the NRC received several Classification Issue/Comment Sheets requesting clarification on the application of the agency's classification guidance in an effort to dispel any misunderstanding or alternate interpretations, which may lend themselves to over-classification or under-classification.
